

JAMES ELLERCAMP

SOFTWARE ENGINEER II
& COMPOSER

BIO

As an experienced developer and music producer, I bridge the technical and creative aspects of each project. My current work includes full-stack web architectures, real-time interactive game development, and end-to-end creative production.

I have a reliable track record of moving seamlessly between front-end user interfaces, back-end services, gameplay systems, and building UX-optimized, scalable web apps.

My background in screen composition has served as a foundation to follow creative briefs and work collaboratively in cross-functional settings.

EDUCATION

Juno College of Technology

EXPERIENCE

TimePlay / StreamSix

Software Engineer II / Intermediate Developer (2025-present)

Junior Developer, Web and Games Teams (2022-2025)

Select Projects

- **JEOPARDY! Bar League | Sony Pictures Entertainment**
 - Unity, WebGL, C#, Golang, React, Steam
 - Engineered the official interactive Jeopardy game supporting thousands of concurrent players across 300+ live venues throughout North America and deployed across WebGL and Steam platforms.
 - Provided critical contributions to Main Screen, Operator's Console, a Room Message Bus-style Actor, and the Controller app for players' devices.
 - Managed game report databases and streamlined cross-platform deployments using Unity Cloud Build.
- **Instant Wins | Carnival Cruises**
 - React, TypeScript, Tailwind CSS, Docker, Animations, Video, Audio and SFX
 - Scratchcard-style interactive gambling games deployed across the global Carnival Cruise fleet.
 - Developed front-end structures, coded original animations, and executed full Audio/SFX integration directly tied to real-time gameplay feedback loops.
- **Keycloak Authentication**
 - React, CSS, Docker, FTL and Theme development, Admin Console Operations
 - Developed and updated custom authentication themes using FreeMarker (FTL) templates for the company-wide unified sign-on system.
 - Managed the Keycloak admin console, including technical troubleshooting to resolve authentication and account issues for internal teams and clients.

Freelance Music Production & Scoring

Composer, Music Director, Producer (2013-present)

- Composed an original feature-length score for *Sunset Superman (2024)* starring Billy Zane and Michael Jai White (Raven Banner Productions).
- Scored and produced commercial audio assets for high-profile campaigns (Eggplant Collective, TA2 Studios).
- Produced, mixed, and engineered multi-genre music and managed end-to-end creative themes and asset delivery (Read the North Podcast, Met Radio, WOTS Toronto).
